

VERSIWELD®

SYSTEM ACCESSORIES

Innovative, Flexible, Efficient, High-Performing & Economical. Versico, a leader in the manufacturing and sale of quality heat-weldable TPO membranes and accessories, introduces VersiWeld pre-fabricated TPO accessories and flashings. Offering economical solutions to field fabrication in both standard and custom hard-to-flash situations, contractors and owners are saving time and money with Versico's easy-to-install, pre-fabricated accessories.

VersiWeld TPO Split Pipe Seals are fabricated flashings made of 45-mil reinforced VersiWeld membrane. Split (cut) and overlap tabs allow the pipe seals to be opened and wrapped around a round pipe with an obstruction.

VersiWeld TPO Square Tubing Wraps are made of 45-mil reinforced VersiWeld membrane. A split (cut) and overlap tabs allow the seals to be opened and wrapped around square tubing.

VersiWeld TPO Curb Wrap Corners are made of 45-mil reinforced VersiWeld membrane. With six sizes available to fit curbs up to 6' by 6', this innovative product reduces installation time compared to conventional flashing methods.

VersiWeld QA Cover Strip is reinforced TPO membrane laminated to a fully cured synthetic rubber quick applied adhesive. Available in white, gray and tan, QA Cover Strip provides maximum protection against inclement weather and is ideal for seams and stripping in metal edge flashings.

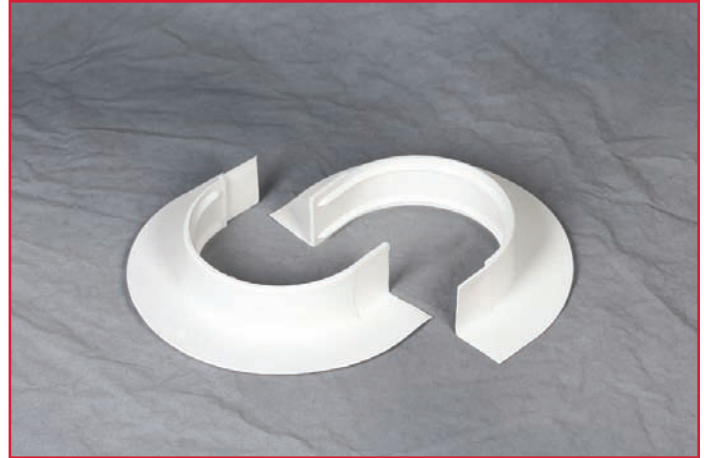

VERSIWELD®

SYSTEM ACCESSORIES

VersiWeld's TPO QA RTS is a reinforced TPO membrane strip with a quick applied tape laminated along one edge. Placed below the deck membrane, TPO QA RTS provides membrane securement at angle changes without penetrating the sheet.

VersiWeld's Molded TPO Sealant Pockets consist of an interlocking, two-piece, injection molded flexible pocket with a rigid polypropylene vertical wall and preformed deck flanges. Used with Versico sealant and primer, this product effectively waterproofs pipe clusters or other odd shaped penetrations on VersiWeld roofing systems.

VersiWeld's TPO T-Joint Covers are a pre-punched, non-reinforced flashing used to seal "T-joint" intersections on 60-, 72-, and 80-mil TPO membranes.

VersiWeld's TPO Flashing is a non-reinforced thermoplastic polyolefin based membrane used for field fabricated pipe flashings, sealant pockets and scuppers when the use of a pre-molded accessory is not feasible.
